Dear Sir:

Disclosure Statement Pursuant to 37 C.F.R. §1.56

Transmitted herewith is an Information Disclosure Statement disclosing information which has come to the attention of applicant(s) and/or their agents and is being submitted in compliance with the duty of disclosure set forth in 37 C.F.R. §1.56.

This submission does not represent that a search has been made or that no better art exists and does not constitute an admission that each or all of the listed documents are material or constitute "prior art." If the Examiner applies any of the documents as prior art against any claim in the application and applicant determines that the cited documents do not constitute "prior art" under United States law, applicant reserves the right to present the relevant facts and law regarding the appropriate status of such documents.

Applicant further reserves the right to take appropriate action to establish the patentability of the disclosed invention over the listed documents, should one or more of the documents be applied against the claims of the present application.

In accordance with 37 C.F.R. §1.98, transmitted herewith are:

1. A completed copy of Form PTO/SB/08 "Information Disclosure Statement by Applicant" listing the patents, publications and other information being submitted for consideration; and

2. A legible copy of each patent, publication and other item of information in written form listed on the enclosed Form PTO/SB/08, except for copies of U.S. patents and published U.S. patent applications which are not required for applications filed after 30 June 2003.

As this application was filed after 30 June 2003, copies of the U.S. patents and published U.S. patent applications listed on the enclosed Form PTO/SB/08 are not required and, therefore, not included herewith.

As will be seen, listed on the enclosed Form PTO/SB/08 is Mexican Patent Document No 165,091, which is not in the English language. A copy of that patent document is enclosed herewith. Applicant has obtained an English-language translation of the Specification and drawing text of that patent document, and encloses a copy herewith. Likewise, published application WO 93/22490, which is also listed on the enclosed Form PTO/SB/08, is published in the German language with an English abstract. That German-language published application (with English abstract) was already filed with the Office with the Applicant's Disclosure Statement and Form PTO/SB/08 dated March 5, 2004. Applicant has since obtained an English-language translation of the Specification and drawing text of published application WO 93/22490 and that English-language translation is enclosed herewith. For the Examiner's convenience, the German-language published application WO 93/22490 (with English abstract), is submitted herewith along with the English translation and is therefore listed on the enclosed Form PTO/SB/08 notwithstanding the earlier filing of that German-language published application and listing on Applicant's previous-filed Form PTO/SB/08. It is understood from MPEP section 609 that the submission of the enclosed English-language translations satisfies the 37 C.F.R. 1.98(3)(i) requirement for a concise explanation of the relevance of the two noted non-English documents.

Respectfully submitted,

By:
